

AirLogic™

Air Purification

The AirLogic™ System is 'setting the standard' for air filtration with this uniquely designed unit, gives you 360 degree of effective, continual air flow. A special mix of multiple media ingredients and a highly effective 99.9% HEPA filter remove the majority of contaminants to give you a pure clean environment for you and your specimens. Let the AirLogic™ System work for you.

- Clean air • Remove particulates • Removes Mold • Removes Bacteria • 360 degree flow
- Removes Volatile Organic Compounds (VOCs) • Removes Chemical Air Contaminants (CACs)
- HEPA Filter • Carbon Filtration • Special compounds • 2-3000 cubic feet • over 300 CFM
- Continual air flow • Safe and dependable • Worldwide voltage adaptable
- 3 year warranty • CE and ISO 9000:2004 Certified • Quality manufactured

We have designed the AirLogic™ system to operate with a highly efficient electrical system to make it safer, conserve electricity and give worldwide portability. **SAFETY, CONSERVATION, EFFECTIVE**

Air Purification for the laboratory			
Cat. Number	Product	Product Description	Unit
EALL-001	AirLogic™ Laboratory Unit	Outstanding 360 design, complete air flow, carbon and HEPA filter.	each
EALF-001	AirLogic™ Lab Unit Filter	HEPA filtration, 99.997% with carbon for maximum filtration.	each

AirLogic™ means clean air and improved results...
